PROFESSIONAL SUMMARY

Motivated and detail-oriented IT Support Technician with an Advanced Diploma in Information Technology and experience in software development, enterprise application support, and municipal ICT operations. Skilled in Java, JavaScript, SQL, Windows administration, Linux/Unix operations, and enterprise system support. Experienced in supporting BCX Municipal Solutions (Venus), Venus Financial Management System, PayDay Payroll System, vendor coordination, software maintenance, and enterprise application environments. Proven ability to deliver reliable IT support, maintain business-critical systems, and ensure operational continuity across municipal and enterprise environments.

TECHNICAL SKILLS

Programming & Development

- Java, JavaScript, VB.NET
- HTML, PHP
- SQL, PostgreSQL, MySQL
- XAMPP, Apache Tomcat

Remote Support & IT Operations

- Windows OS installation and support
- Hardware, software, printer, and network troubleshooting
- End-user IT support and ticket resolution
- Remote desktop support (TeamViewer)
- Production system support and monitoring

Linux / Unix & System Operations

- PuTTY (remote system access)
- Unix/Linux command-line operations
- Batch system monitoring and process management
- System startup and service verification
- Process control (ipcs, ipcrm)
- Perform production system operations, batch job monitoring, service management, and system recovery in Unix/Linux environments

Enterprise Systems

- BCX Municipal Solutions (Venus)
- Venus Financial Management System

- PayDay Payroll System
- Enterprise Content Management (ELO ECM)

Networking & Infrastructure

- LAN/WAN troubleshooting
- Panasonic telephone system support
- Basic network diagnostics

Tools & Platforms

- Git, GitHub
- WinSCP (FTP file transfer)
- IBM SPSS
- AWS Educate (Compute, Security, Serverless, Cloud Operations)
- Azure Fundamentals
- Cisco Certified Network Associate (CCNA) – Networking and Infrastructure Fundamentals

WORK EXPERIENCE

Software Development Intern

ELO Digital Office | December 2024 – December 2025

- Developed and maintained custom Java and JavaScript scripts for enterprise content management solutions.
- Configured ELO ECM modules including E-Records, Invoice Management, and Contract Management.
- Designed and implemented automated workflows for document routing and approvals.
- Assisted with HR Recruiting module installation, scripting, and enhancements.
- Integrated and optimized data using SQL databases including PostgreSQL and MySQL.
- Deployed applications using Apache Tomcat environments.
- Collaborated in an agile development environment to deliver scalable solutions.

Boot Camp

Geeks4Learning | January 2026 – February 2026

- Learned software development fundamentals
- Business analysis principles
- Web development basics
- Agile collaboration
- SDLC concepts
- Email etiquette

Information Technology Support Technician

Renosterberg Municipality | February 2026 – Present

End-User & Desktop Support

- Troubleshoot and resolve hardware, software, printer, and network-related issues
- Install and configure Windows operating systems and IT equipment
- Support users with daily ICT operational issues
- Provide remote desktop support using TeamViewer

Microsoft Outlook & Email Support

- Provide IT support via hosted email (cPanel-based Outlook/IMAP environment), including account troubleshooting, password resets, and service provider escalation
- Log and track IT issues via email communication with external service provider
- Escalate technical issues to service provider for resolution and follow-up on feedback and updates
- Ensure continuity of hosted email services through coordination with service provider

System Operations & Enterprise Support

- Support BCX financial system operations, including user access, troubleshooting, and basic system administration tasks
- Provide operational support and troubleshooting for payroll system (PayDay), ensuring system availability and user functionality
- Monitor and resolve Panasonic telephony and network connectivity issues
- Coordinate with external vendors for escalated technical issues
- Coordinate software maintenance requests, technical support incidents, and annual maintenance renewals with BCX and municipal stakeholders.
- Assist in reviewing software maintenance agreements and renewal documentation to ensure continuity of municipal ERP services.
- Support mission-critical municipal business applications to ensure high system availability and operational continuity.
- Assist Finance and management with enterprise system support and vendor communication

Unix/Linux Production System Support

- Perform system startup and operational checks using PuTTY (Linux/Unix environment)
- Execute batch process monitoring and system maintenance tasks
- Manage process control operations (ipcs, ipcrm) for system stability
- Start and verify system services (btstart, spstart, adastart)
- Production system support including batch job monitoring, service checks, system recovery, and uptime monitoring in Unix/Linux environments
- Verify and transfer backup files using WinSCP (FTP operations)
- Maintain backup file storage and rotation procedures

EDUCATION

- Advanced Diploma in Information Technology | 2025
- Diploma in Information Technology | 2023
- Vaal University of Technology
- National Senior Certificate Matric – Mbangazeki High School | 2018

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
- AWS Educate – Compute
- AWS Educate – Cloud Operations
- AWS Educate – Serverless
- AWS Educate – Security
- AWS Educate – Deep Racer

PROJECTS

- Primary School Website – HTML, PHP, SQL
- Survey Desktop Application – Java

- Waste Management Chatbot – Botpress
- Website Backend Development – SQL, XAMPP
- IT Statistical Data Analysis – IBM SPSS
- ELO Task Management – Java and Admin console

LANGUAGES

Xitsonga, English, IsiZulu, Sepedi
